

PCNA Digital Services

With PCNA's Digital Services you can electronically access detailed product information, get real time inventory updates, and stay up to date with order status. We have a range of services available today and are actively developing more, and broadening the methods for accessing them.

We provide these services in various forms - online query, files that can be downloaded, and real-time system-to-system web services, and are continuously adding improvements with particular emphasis on development of a wider range of services that leverage the web service approach... enabling more real time, and lower level, system-to-system integration.

Product Information

- **Spreadsheet Format**

Product information for Leed's, Bullet and Trimark (USA) can be downloaded in an Excel file from the Services page for each product line at pcna.com.

Each spreadsheet contains all of our products, their descriptions, colors, features, product category, product and carton dimensions, as well as the five column US and/or CDN coded pricing. Spreadsheets are updated with each product launch, but typically do not immediately reflect items that are moved to Clearance, placed on Sale, or are Discontinued. Due to frequent market price fluctuations, pricing for items in the Memory Category are updated each Monday in a separate spreadsheet.

- * **XML Format**

We also have a similar set of Product Information for Leed's products available for download, in a more system friendly, XML format. We are actively working on expanding the content of this file to include product items from Bullet and Trimark, AND increasing the update frequency to daily by the end of 2015.

Inventory Information

Real time inventory lookup is available for Leed's, Bullet and Trimark via a web service which adheres to standards as described at promostandards.org. This service allows you to electronically integrate the PCNA.com website inventory lookup directly into your systems and websites.

Order Status (coming soon)

Real time order status information is available for Leed's, Bullet and Trimark orders via a web service which adheres to the standards as recently published at promostandards.org. This service allows you to electronically integrate the PCNA.com website order status lookup directly into your systems and websites.

Purchase Order Submission

We have several customized services in place today that allow us to electronically receive purchase orders, publish their status throughout their lifecycle, and provide invoices. We are very interested in opportunities to leverage these services with customers who already have or are in the process of developing these capabilities.

For more information on any of these systems, please contact us at digitalservices@pcna.com.
